

Model Development Phase Template

Date	7 JULY 2024		
Team ID	740078		
Project Title	Slop sense: utilising resort features for regression modelling		
Maximum Marks	4 Marks		

Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include classification reports, accuracy, and confusion matrices for multiple models, presented through respective screenshots.

Initial Model Training Code:

```
!pip install scikit-learn
import pandas as pd
from sklearn.linear_model import LinearRegression
from sklearn.impute import SimpleImputer

imputer=SimpleImputer(strategy='mean')
x_train=imputer.fit_transform(x_train)
x_test=imputer.transform(x_test)

LR=LinearRegression()
LR.fit(x_train,y_train)
```

```
!pip install scikit-learn
import pandas as pd
from sklearn.linear_model import LinearRegression
from sklearn.impute import SimpleImputer

imputer=SimpleImputer(strategy='mean')
x_train=imputer.fit_transform(x_train)
x_test=imputer.transform(x_test)

LR=LinearRegression()
LR.fit(x_train,y_train)
```

Model Validation and Evaluation Report:

Model	Classification Report	F1 Scor e	Confusion Matrix
-------	-----------------------	-----------------	------------------
