Data Collection and Preprocessing Phase

Date	15 JULY 2024
Team ID	740078
Project Title	Slop Sense: Utilising Resort Features For Regression Modelling
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Report:

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan:

Section	Description
Project Overview	This project overview aims to utilize reset features to enhance regression modeling by identifying and resetting irrelevant features, leading to improved model accuracy and interpretability.
Data Collection Plan	This data collection plan aims to gather and prepare relevant data for reset feature regression modeling, ensuring data quality, relevance, and sufficient sample size for accurate model training and evaluation.
Raw Data Sources Identified	Raw data needs to be cleaned, transformed, and processed before it can be used for analysis, modeling, or machine learning.

Raw Data Sources Report:

Source Name	Description	Location/URL	Format	Size	Access Permissions
Kaggle Dataset	The dataset a resort is a self-contained destination that offers a variety of amenities, activities, and services..	https://g.co/kgs/91ZwWSj	CSV	15 kB	Public
UCI	- Applying reset feature techniques to select and transform relevant features - Improving model performance by reducing feature noise and correlations	https://g.co/kgs/bkygjRC	CSV	13.6 kB	Public
